SUMMARY

<https://github.com/SancakBerk>

Hello! I'm Berk Sancak, a dedicated software developer. I specialize in developing web applications using React and Next.js, and for mobile applications, I choose Flutter. You can find more details about me and explore the projects I've developed on my GitHub profile.

On the backend side, I work with Sql as the database and leverage Node.js to develop APIs, ensuring effective data management. In my projects, I focus not only on design but also on enhancing application performance and user experience. The projects on my GitHub profile provide a deeper insight into my technical skills and development capabilities. I am committed to adapting to new technologies and providing valuable support to your projects. Feel free to check out my GitHub profile for a comprehensive overview of my work. I have projects that are fast, scalable, and performance-oriented.

Fatih Can Yazıcı ---- Digital Operation Services Inc ---- 05064394231 ---- fatih.yazici@dop.com.tr (Mobile developer)

EXPERIENCE

Full Stack Web Developer

UTrust

February 2023 - July 2024, Remote/australia
